

Because everyone has a right to good health

Demand for medicinal products

Medicinal product costs

■ Generics ■ Patent-protected medicinal products, off-patent brand name products

In 2017, 78 percent of all medicinal products financed by German statutory health insurance companies were generics. These cost-effective products based on off-patent active substances represented 9.2 percent of the total expenditure on medicinal products.

My choice for medicine

Source: April 2018, Pro Generika e. V.

Anne Maria Mohrs, Pharmacist,
Deputy Director of Production/
Division Manager R&D,
Lindopharm, Hilden

“Medicines containing commercially available active substances can still be improved in many ways. I can use my specialist knowledge to do this and incorporate new ideas.”

Edgar Bernthäusl,
Head of Production,
Steiner & Co., Berlin

“The production of antibiotics is a specialist area. We rise to the challenge with diligence, teamwork, and my extensive experience as a pharmaceutical technician.”

Julian Ellermeier,
Purchaser, Aristo Pharma, Berlin

“I manage our supply capacities in Berlin to ensure that every product can reach you quickly.”

Nadine Schreiber, Technology Transfer Team,
Advance Pharma, Berlin

“Our team is responsible for smooth production transfer within the Aristo Pharma Group. To ensure successful implementation, we work hand in hand with our colleagues.”

Christian Keye,
Deputy Director Bulk
Production - Solids,
Pharma Wernigerode

“You can only inspire your colleagues if you show commitment and interest in the company yourself. At Pharma Wernigerode, that is not hard for me to do.”

Fátima Ramos Moreno, Quality Assurance, Medinsa, Madrid

“Our work helps Medinsa meet the most stringent quality standards and retain the trust of our customers.”

Nicole Pluntke,
Distribution>Returns,
esparma Pharma Services, Magdeburg

“It is great to be a part of this large company and to make a contribution to the health of those around us.”

Welcome to Aristo Pharma!

Employees at the Aristo Pharma Group are committed to supplying the best medicinal products at all times.

We believe that having a healthy future should not be a question of money.

Health is our most valuable possession. Therefore, we have made it our mission to provide quality medicines rapidly and affordably. In this way, we can also provide lasting support for our health system. This is made possible through the combined skills of German and European companies within the Aristo Pharma Group.

For your rights.
For your well-being.

We offer affordable medicines from Germany.

This is made possible by the work of the committed staff at our Group Headquarters in Berlin, six further sites in Germany and in Madrid, Spain.

We provide the highest quality and maximum efficacy in all of our products.

We develop medicines from off-patent active substances (generics) and manufacture over-the-counter medicinal products. These are constantly being optimized and adapted to your needs in our plants and laboratories.

This makes our products easy to access and reliable for those who need them.

Our goal is to preserve the health of all people –
regardless of age, sex, financial means, or life situation.

We can achieve this with tried and tested active substances for each patient.

One such example is St John's wort (*Hypericum perforatum*).
This plant has been used since antiquity for its healing effect.

Safety and transparency are our top priorities in all processes.

This is why each production site has strict quality management for the highest possible safety standards.

Your trust is important to us.

Every Aristo Pharma medicine represents a great responsibility to the people who trust us. The safety of each individual patient is paramount. By using cutting-edge technology in line with the latest research and our many years of experience, we consistently guarantee high quality at all sites.

Product development and optimization

The main pillar of an affordable health care system are generics – medicines made from off-patent active substances. Our laboratories are constantly working to develop these even further, so that we can always offer the best products.

Protecting people and the environment

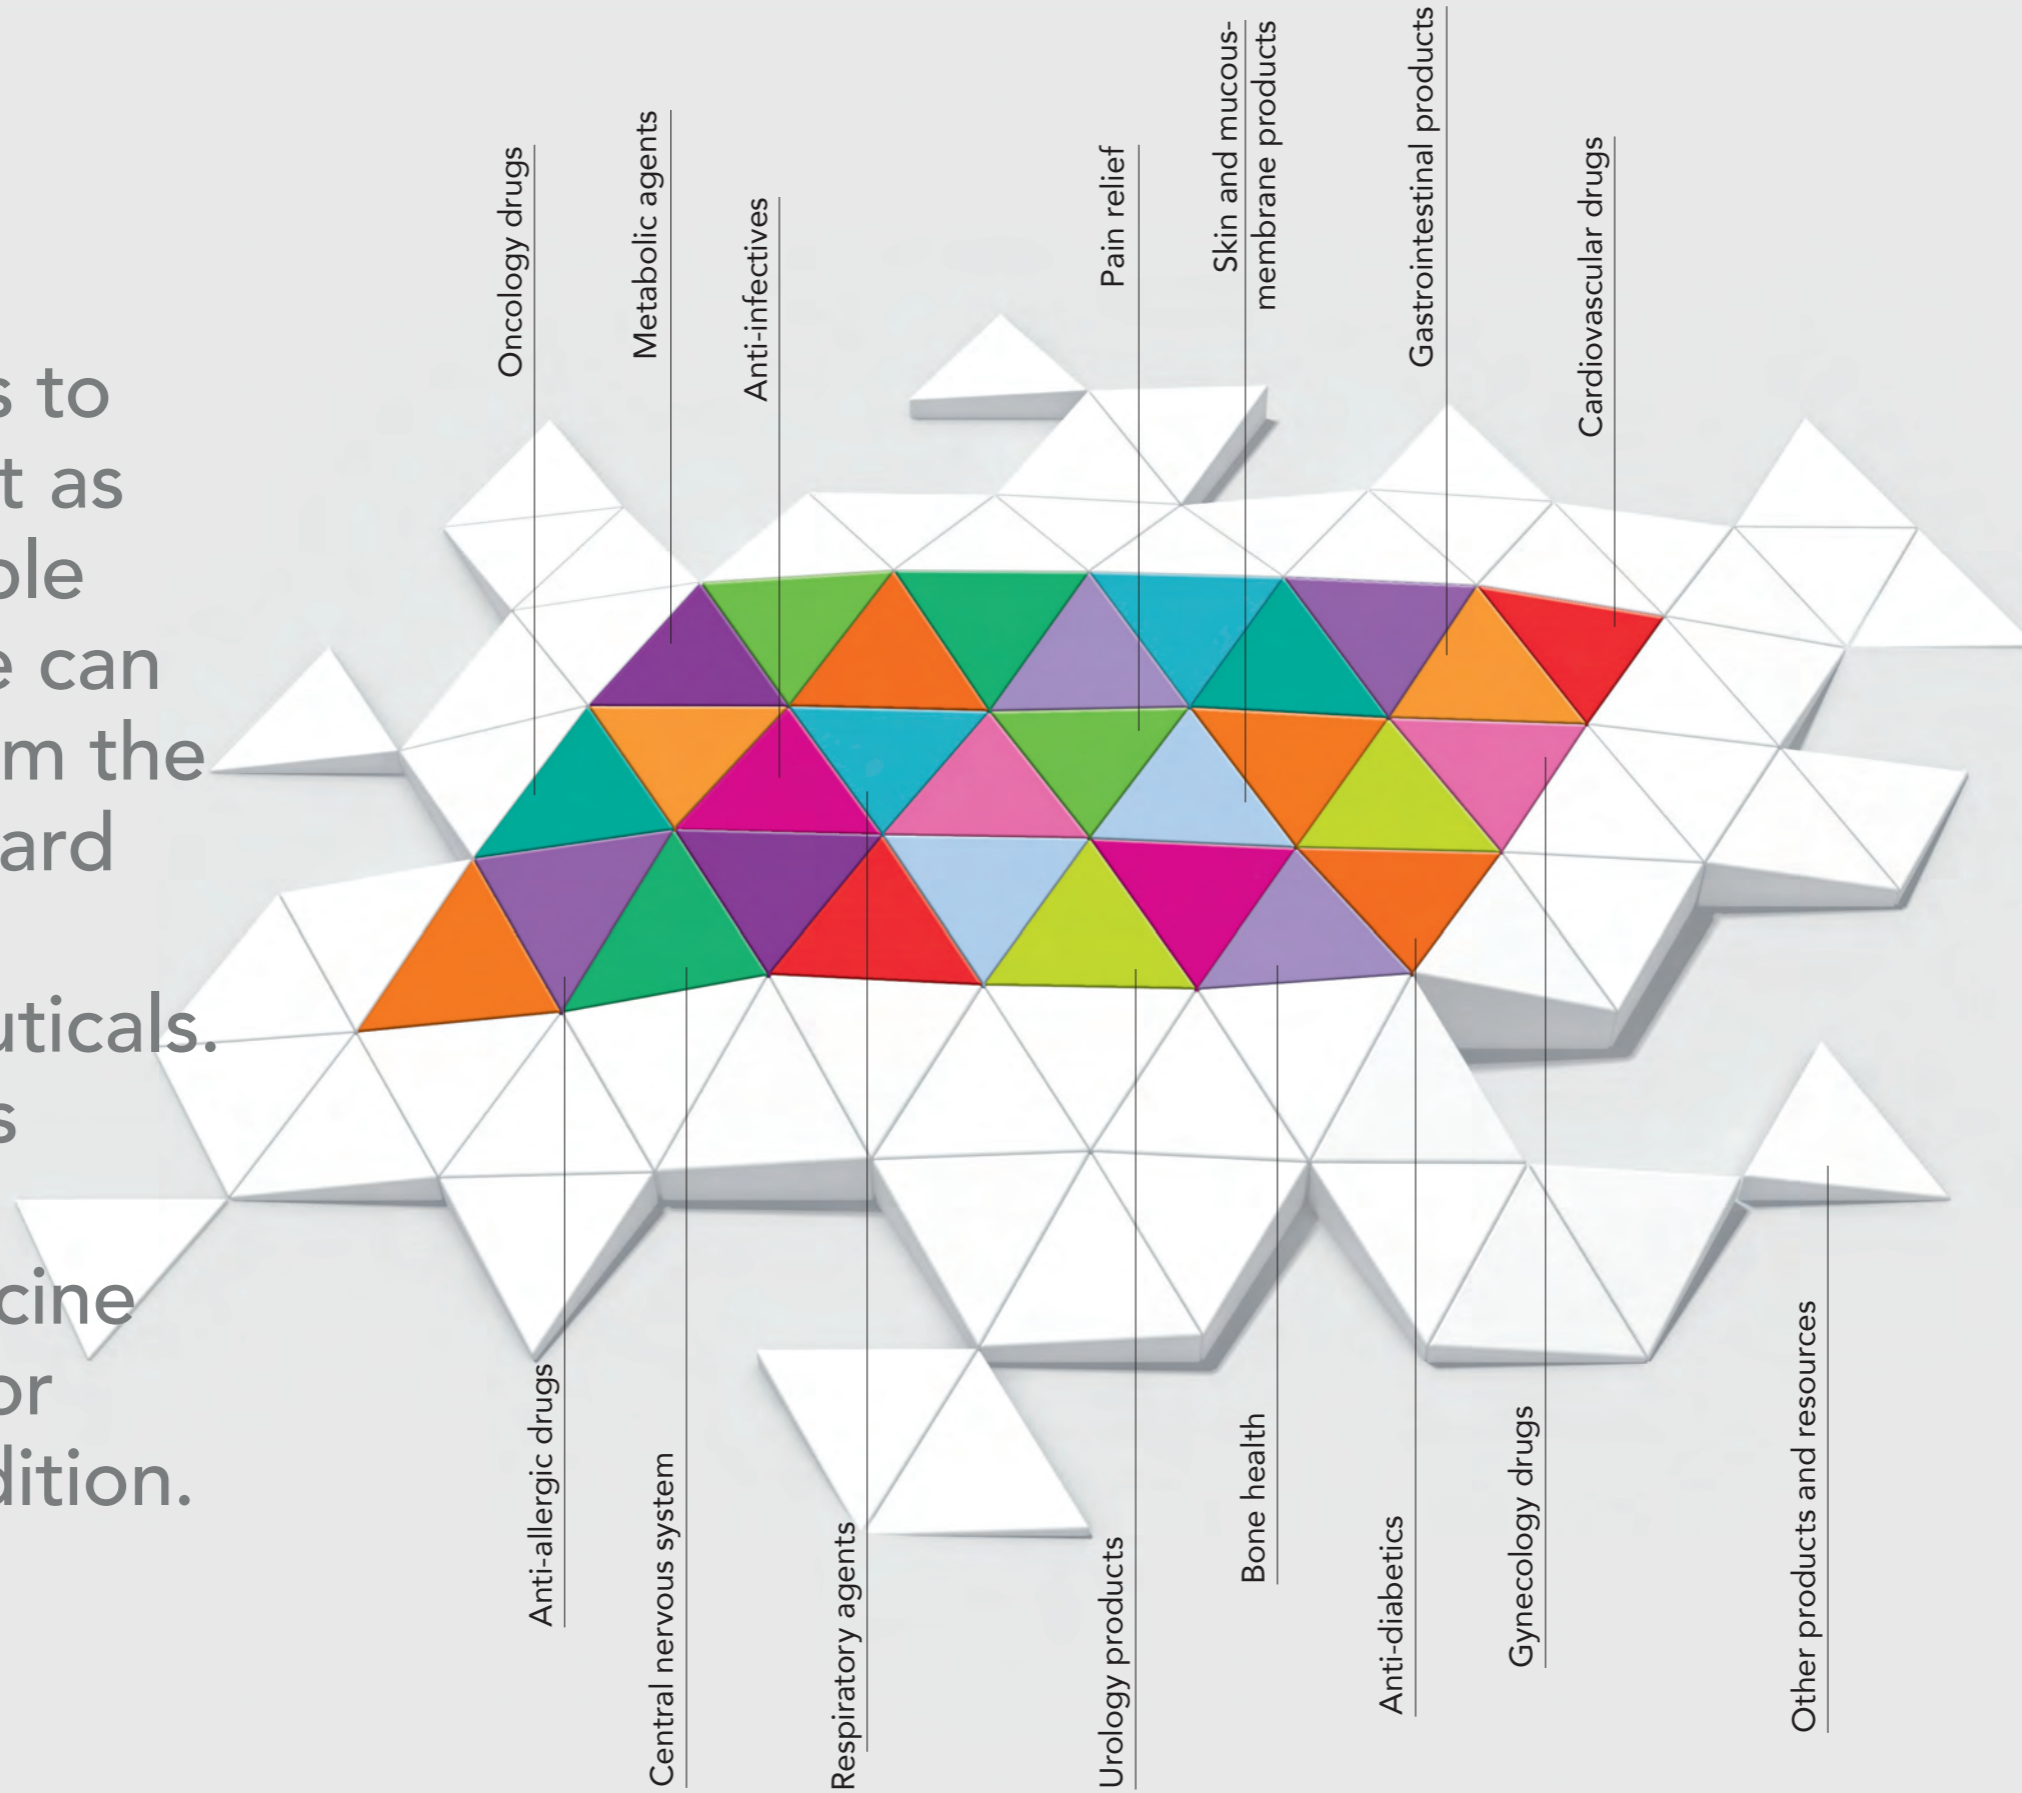

All of our facilities apply high quality standards that are subject to continuous monitoring. We also adhere to the stringent guidelines of Good Manufacturing Practice (GMP).

All from one supplier

We manufacture the vast majority of our products ourselves. We also perform substance analytics, stability testing, procurement of raw materials, and the manufacturing of tablets, sachets, and powders.

All-round protection

Our goal is to ensure that as many people as possible can benefit from the high standard of modern pharmaceuticals. This means having the right medicine available for every condition.

Headquarters

Centralized tasks are managed by employees at our headquarters in Berlin. From here, we can coordinate the operations of the entire group – and if there are any questions about Aristo Pharma, we are here to help!

Training

We believe it is important to stay up to date with the latest research. Therefore, our employees take part in regular training.

International teams

We bring together knowledge from employees from all over the world – at our sites in Germany and Spain and at our ever-growing international sales locations.

Self-development

We place utmost importance on the fact that our employees have the freedom to put forward their own ideas and suggestions for optimization.

Experience

Aristo Pharma was established in 2008, but draws on many years of expertise: the oldest company in the group is Pharma Wernigerode GmbH, which has been successfully manufacturing medicinal products for over 110 years.

At Aristo Pharma we are always developing our products. And ourselves.

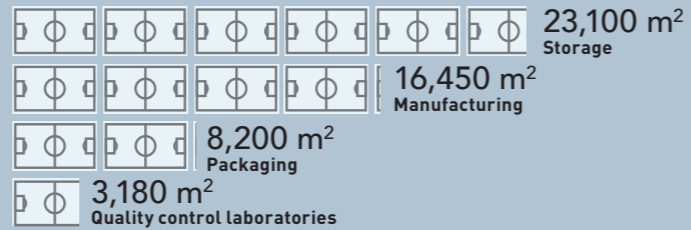

The Aristo Pharma Group consists of six companies with up to 110 years of experience. Since 2008, we have brought all this expertise together to shape a strong collective as one of the largest manufacturers of medicinal products in Germany. The basis of this strength is our people, who drive our success now and in the future.

Aristo Pharma in numbers: 1 central office, 5 manufacturing sites, and 1 logistics center ...

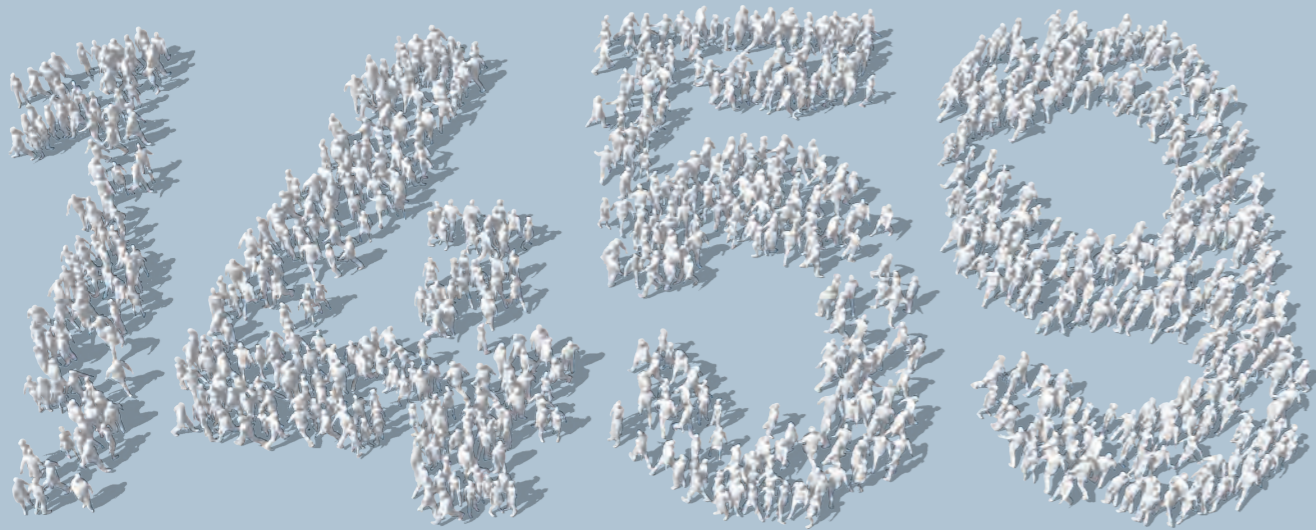

Total surface area
222,000 m²

4 x the ground area of
the Great Pyramid of Giza

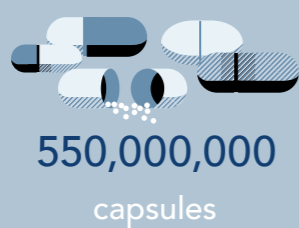

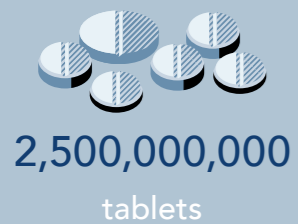

Combined, this is equivalent to the
area of 12 standard soccer fields
